

Make a hundred to subtract

Add the same amount to both numbers to make a multiple of 100. Then subtract.

Example

$$\begin{array}{r} 413 - 198 \\ \downarrow +2 \quad \downarrow +2 \\ 415 - 200 = 215 \end{array}$$

Change the number you take away into a multiple of 100. Add the same amount to both numbers. The difference stays the same, and taking away hundreds is easy.

1. $352 - 197$

Add to both numbers.

$$\boxed{} - \boxed{200} = \boxed{}$$

2. $614 - 298$

Add to both numbers.

$$\boxed{} - \boxed{300} = \boxed{}$$

3. $781 - 396$

Add to both numbers.

$$\boxed{} - \boxed{400} = \boxed{}$$

4. $905 - 499$

Add to both numbers.

$$\boxed{} - \boxed{500} = \boxed{}$$

5. $463 - 195$

Add to both numbers.

$$\boxed{} - \boxed{} = \boxed{}$$

6. $827 - 398$

Add to both numbers.

$$\boxed{} - \boxed{} = \boxed{}$$

7. $540 - 294$

Add to both numbers.

$$\boxed{} - \boxed{} = \boxed{}$$

8. $936 - 597$

Add to both numbers.

$$\boxed{} - \boxed{} = \boxed{}$$
