

Number line hops: add

Start on the first number. Hop forward the second number. Where do you land?

Example

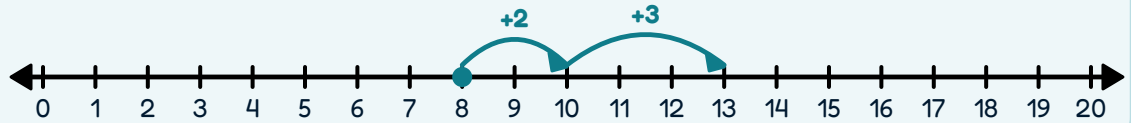

$$\boxed{8} + \boxed{5} = \boxed{13}$$

Start at 8.

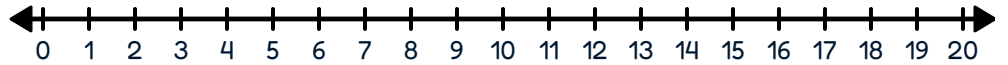

Hop 2 to get to 10.

Hop 3 more to land on 13.

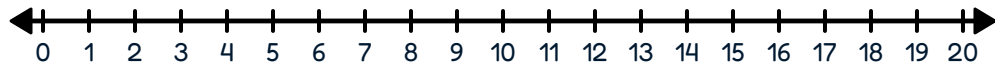

① Hop on the number line. Write where you land.

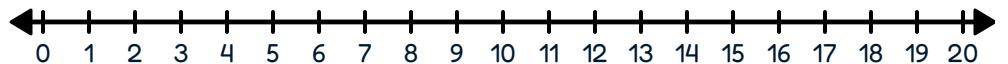

$$\boxed{7} + \boxed{6} = \boxed{}$$

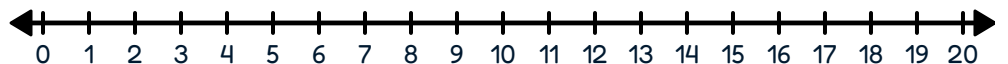

$$\boxed{9} + \boxed{5} = \boxed{}$$

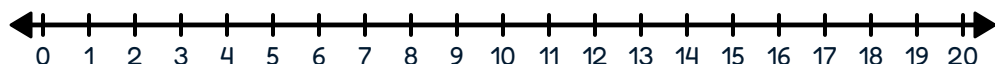

$$\boxed{12} + \boxed{4} = \boxed{}$$

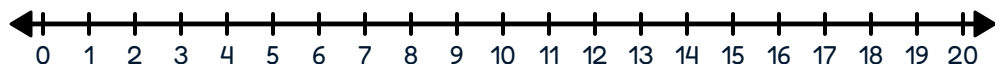

$$\boxed{6} + \boxed{9} = \boxed{}$$

$$\boxed{11} + \boxed{7} = \boxed{}$$

$$\boxed{14} + \boxed{5} = \boxed{}$$

② Now try these in your head.

$$8 + 3 = \boxed{} \quad 10 + 6 = \boxed{} \quad 5 + 7 = \boxed{} \quad 13 + 4 = \boxed{} \quad 9 + 9 = \boxed{} \quad 6 + 8 = \boxed{}$$
