

Number 4 — Facilitator Guide

KINDERGARTEN–GRADE 1 • MATHEMATICS •
PRINT READY WORKSHEET

Number 4: Trace, Count, Circle. Use the original one-page worksheet; the numbered directions below reproduce the printed task.

Quick Start

Learning target: Form the numeral 4 using correct stroke order; Recognise the numeral 4 among similar numerals; Count and represent a set of 4; Represent 4 on a ten frame

Time	Grouping	Materials
Teacher-paced; adjust to the student	Individual work with adult support as needed	Printed worksheet • Pencil • Crayons

GUIDING QUESTIONS	Show this numeral on the page. How could you check the amount it represents? Show me how you checked your work on Number 4.
-------------------	--

Facilitation Sequence

1 Introduce the worksheet

Look at Number 4. Read the title and printed directions aloud together.

Watch for: Check that students can locate the first task before starting.

TEACHING TIP • A useful prompt here is: "Show this numeral on the page. How could you check the amount it represents?"

2 Work through the printed tasks

1. Trace the 4. 2. Write the 4. 3. Colour 4 kites. Fill 4 boxes. 4. Circle every 4.

Watch for: Use the printed formation cue for tracing and writing. In counting tasks, touch each object once and connect the total to the numeral. For zero, discuss an empty group.

TEACHING TIP · A useful prompt here is: "Complete the tasks in the order printed on the page."

3 Review together

Revisit the completed parts of Number 4. Ask the student to point to their work and explain or demonstrate one choice.

Watch for: Use the actual printed examples when checking a response; do not infer an answer from the worksheet title.

4 Choose a next step

Review progress towards: Form the numeral 4 using correct stroke order

Watch for: Record which task was completed independently and which needed modelling. Revisit the same printed task with support if needed.

Likely Student Responses, Misconceptions, and Helpful Teacher Moves

Anticipate these — and the response that moves thinking forward.

Students may...	What that might mean...	A helpful next move...
Begin Number 4 without following the printed direction.	The task language or order may need clarification.	Read the direction aloud and ask the student to point to where they will begin.

Students may...	What that might mean...	A helpful next move...
Need more practice with this skill: Form the numeral 4 using correct stroke order	The skill may still need modelling or practice.	Use the printed formation cue for tracing and writing. In counting tasks, touch each object once and connect the total to the numeral. For zero, discuss an empty group.

Equity, SEL, and Trauma-Informed Prompts

Equity	SEL	Trauma-Informed
<i>Perspective invitations you can offer students — a second context, a missing voice, a different lived reality.</i> Offer oral directions and time to become familiar with the worksheet pictures. Do not assume that every pictured object is familiar.	<i>The emotional and interpersonal demands of this task — confidence, disagreement, frustration points, collaboration.</i> Use specific feedback about a strategy or effort. Allow a pause and another attempt when the task becomes frustrating.	<i>Participation safety and predictability — a private response option, lower-stakes sharing, predictable structure.</i> Keep the task sequence predictable. Offer private sharing and do not require personal or family disclosures about the pictures.

UDL, Differentiation, and Language Supports

If students need more support

Scaffolds for the same core thinking: oral rehearsal first, sketch or sort before writing, a worked example, chunked steps.

Use the printed formation cue for tracing and writing. In counting tasks, touch each object once and connect the total to the numeral. For zero, discuss an empty group.

Cover later tasks temporarily and work through one printed direction at a time.

If students are ready for more

Extensions that add complexity, not busywork: compare two approaches, justify a choice, transfer to a new context.

Ask the student to explain how they checked a completed task on Number 4.

Invite another example orally; treat this as an optional extension, not an extra printed question.

Language supports

Name the language function (explain, compare, argue, justify) with sentence frames and oral rehearsal.

Read each printed instruction aloud and pair the action word with a demonstration.

Allow pointing, oral rehearsal, or a response in a familiar language before a written response.

Assessment Look-Fors and Next Steps

What to look for

Criterion	What it looks like here	Possible evidence	Helpful next step
Form the numeral 4 using correct stroke order	The student demonstrates this skill in the corresponding printed task.	Observe the completed task and ask the student to explain or demonstrate their approach.	Model the part that needed support, then offer another attempt on the same task.
Recognise the numeral 4 among similar numerals	The student demonstrates this skill in the corresponding printed task.	Observe the completed task and ask the student to explain or demonstrate their approach.	Model the part that needed support, then offer another attempt on the same task.
Count and represent a set of 4	The student demonstrates this skill in the corresponding printed task.	Observe the completed task and ask the student to explain or demonstrate their approach.	Model the part that needed support, then offer another attempt on the same task.

Criterion	What it looks like here	Possible evidence	Helpful next step
Represent 4 on a ten frame	The student demonstrates this skill in the corresponding printed task.	Observe the completed task and ask the student to explain or demonstrate their approach.	Model the part that needed support, then offer another attempt on the same task.

Reteach signal: If the student cannot explain or demonstrate the printed task, model one example and revisit: Form the numeral 4 using correct stroke order
