

Round fractions to the nearest whole

Use the number line to decide which whole number each fraction is closest to.

① Mark each fraction with a dot. Then write the nearest whole number.

1. Round $3\frac{5}{8}$

nearest whole

2. Round $6\frac{1}{4}$

3. Round $1\frac{2}{5}$

4. Round $8\frac{5}{6}$

5. Round $4\frac{1}{2}$

6. Round $\frac{7}{10}$

② Round to the nearest whole number without a number line.

a. $5\frac{1}{3} \rightarrow$

b. $2\frac{7}{8} \rightarrow$

c. $9\frac{3}{5} \rightarrow$

d. $7\frac{2}{9} \rightarrow$

e. $11\frac{5}{12} \rightarrow$

f. $12\frac{6}{11} \rightarrow$
