

Arrays and multiplication

Count the rows, then count how many are in each row. Multiply to find the total.

1 Learn about arrays.

6 in each row

3 rows

3 rows of 6

$3 \times 6 = 18$

Every row in an array is the same.

2 Write a multiplication for each array.

1.

$\square \times \square = \square$

2.

$\square \times \square = \square$

3.

$\square \times \square = \square$

4.

$\square \times \square = \square$

5.

$\square \times \square = \square$

6.

$\square \times \square = \square$

3 Draw an array. Then multiply.

Draw 2 rows of 5.

$2 \times 5 = \square$

Now draw 5 rows of 2.

$5 \times 2 = \square$

Aiyana plants 4 rows of 3 lettuces. Draw her garden.

$\square \times \square = \square$ plants
