

A marine food web

Study this food web from the coast of British Columbia. Arrows point from food to eater.

1 Use the food web to answer.

- | | |
|---|--|
| <p>1. Name the two producers in this food web.</p> <p>_____</p> | <p>4. What does the sea otter eat?</p> <p>_____</p> |
| <p>2. What do the arrows show?</p> <p>_____</p> | <p>5. Which consumers eat kelp?</p> <p>_____</p> |
| <p>3. Which animals eat krill?</p> <p>_____</p> | <p>6. Is the octopus a predator, prey or both? Explain.</p> <p>_____</p> |

2 Write one food chain from the web with four living things.

3 Sea otters eat sea urchins. If the sea otters disappeared, what could happen to the kelp? Why?
