

Subtract with regrouping

Check the ones. If there are not enough, trade 1 ten for 10 ones. Then subtract.

1 Learn how.

EXAMPLE $52 - 27 = 25$

- ① Not enough ones to take away 7, so trade 1 ten for 10 ones.
- ② Ones: $12 - 7 = 5$.
- ③ Tens: $4 - 2 = 2$.

3 Solve the story.

There are 61 Canada geese on the pond. Then 34 geese fly away. How many geese are still on the pond?

Answer: geese
