

Divide by multiples of ten

Divide. Write the quotient (Q) and the remainder (R) in the boxes.

Worked example

Use a basic fact: $28 \div 4 = 7$,
so $280 \div 40 = 7$.
 $283 - 280 = 3$ left over.
 $283 \div 40 = 7 \text{ R } 3$

$$\begin{array}{r} 7 \text{ R } 3 \\ 40 \overline{) 283} \\ \underline{- 280} \\ 3 \end{array}$$

Check:
 $40 \times 7 + 3 = 283$
