

I Provinces, territories and their regions

Use a map of the five regions of Canada to sort each province and territory.

1 Read the 13 provinces and territories. Cross each one off as you write it in the table.

PROVINCES AND TERRITORIES

Prince Edward Island

British Columbia

Ontario

Manitoba

Newfoundland and Labrador

Nova Scotia

New Brunswick

Saskatchewan

Northwest Territories

Nunavut

Quebec

Alberta

Yukon

2 Write each one under its region. Then write how many are in each region.

Atlantic Canada Atlantic coast, islands and the Bay of Fundy	Central Canada home to the most people and the largest province	Prairie Provinces flat prairie and wheat fields	West Coast Pacific coast and Rocky Mountains	The North Arctic islands, huge lakes and the Klondike
How many?	How many?	How many?	How many?	How many?

3 Think about it.

- 1 Which region has only one province? Name the region and the province.
- 2 Which region is made up of territories only? Name all three territories.
- 3 Which region do you live in, or which would you most like to visit? Why?
