

I States and their regions

Use a map of the five US regions to sort each state into its region.

1 Read the 20 states. Cross each one off as you write it in the table.

STATES

Minnesota

Oregon

Vermont

California

Texas

Montana

Georgia

Florida

New York

Ohio

Massachusetts

Tennessee

Louisiana

Maine

Hawaii

Arizona

Kansas

New Mexico

Iowa

Oklahoma

2 Write each state under its region. Each region gets four states.

Northeast New England and the Atlantic coast	Southeast warm Atlantic and Gulf coasts	Midwest Great Lakes and farm plains	Southwest deserts, canyons and dry plains	West Rocky Mountains, Pacific coast, Alaska and Hawaii

3 Think about it.

- 1 Which region has only four states in all? Name all four.
- 2 Alaska and Hawaii do not touch the other states. Which region are they in?
- 3 Which region do you live in, or which would you most like to visit? Why?
