

I Multiply two ways

Solve each fact with both strategies. Write the product at the top when both answers match.

$$4 \times 3 = \boxed{}$$

Array

$$4 \text{ rows of } 3 = \boxed{}$$

Switch the factors

$$3 \times 4 = \boxed{}$$

Same answer?

yes

no

$$5 \times 6 = \boxed{}$$

Skip count by 5s

Count 6 jumps of 5.

Break apart 6 into 3 and 3

$$5 \times 6 = 5 \times 3 + 5 \times 3$$

$$= \boxed{} + \boxed{} = \boxed{}$$

$$4 \times 7 = \boxed{}$$

Double a double

$$2 \times 7 = \boxed{}$$

Now double it.

$$4 \times 7 = \boxed{} + \boxed{} = \boxed{}$$

Break apart 7 into 5 and 2

$$4 \times 7 = 4 \times 5 + 4 \times 2$$

$$= \boxed{} + \boxed{} = \boxed{}$$

$$6 \times 8 = \boxed{}$$

Break apart 6 into 5 and 1

$$6 \times 8 = 5 \times 8 + 1 \times 8$$

$$= \boxed{} + \boxed{} = \boxed{}$$

Double a fact

$$3 \times 8 = \boxed{}$$

Now double it.

$$6 \times 8 = \boxed{} + \boxed{} = \boxed{}$$
