

# Add with a place value chart

Line up the digits in the chart. Add each column, then write the sum.

## EXAMPLE

$$432 + 6 = 438$$

Write each digit in its column.  
Add the ones, then the tens,  
then the hundreds.

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 4        | 3    | 2    |
| + |          |      | 6    |
|   | 4        | 3    | 8    |

1.  $251 + 6 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 2        | 5    | 1    |
| + |          |      | 6    |
|   |          |      |      |

2.  $613 + 5 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 6        | 1    | 3    |
| + |          |      | 5    |
|   |          |      |      |

3.  $340 + 7 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 3        | 4    | 0    |
| + |          |      | 7    |
|   |          |      |      |

4.  $722 + 4 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 7        | 2    | 2    |
| + |          |      | 4    |
|   |          |      |      |

5.  $185 + 3 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 1        | 8    | 5    |
| + |          |      | 3    |
|   |          |      |      |

6.  $903 + 6 =$   

|   | hundreds | tens | ones |
|---|----------|------|------|
|   | 9        | 0    | 3    |
| + |          |      | 6    |
|   |          |      |      |
