

Name the water cycle stage

Read each sentence. Write the water cycle stage it describes.

STAGES

evaporation

condensation

precipitation

runoff

collection

transpiration

1 Name the stage for each sentence. Some stages are used twice.

	What is happening?	Stage
1	Puddles on the playground shrink and disappear on a hot afternoon.	
2	Tiny drops of water form on the outside of a cold glass of juice.	
3	Snowflakes fall on the ski hills at Whistler, British Columbia.	
4	Summer rain in Mexico City pours down the streets into drains.	
5	A maple tree gives off water vapour through tiny holes in its leaves.	
6	Water from many rivers and streams gathers in Lake Superior.	
7	The bathroom mirror fogs up after a hot shower.	
8	Hail bounces off cars during a summer storm in Calgary, Alberta.	
9	Wet towels on a clothesline dry in the sun and wind.	
10	Melting snow trickles down Ben Nevis in Scotland into a stream.	

2 Choose one stage. Explain how the sun's energy helps it happen.
