

Find the net charge

Count the charges on each balloon. Write its net charge, then sort the balloons.

Example

Count: 4 plus and 2 minus charges.

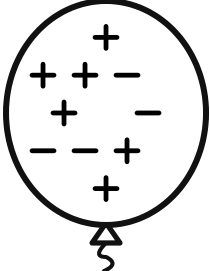

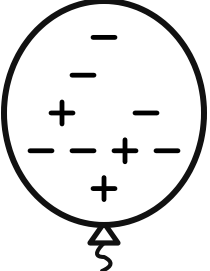

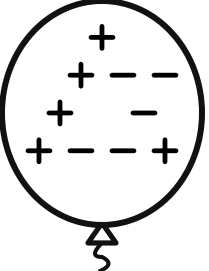

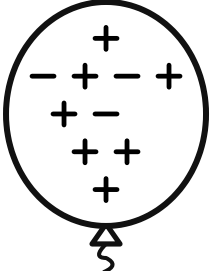

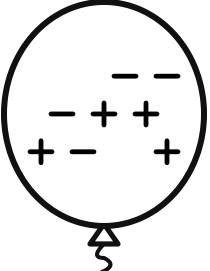

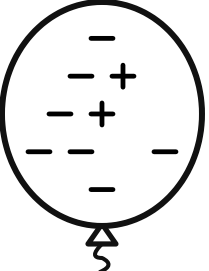

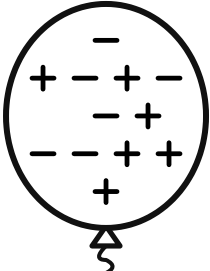

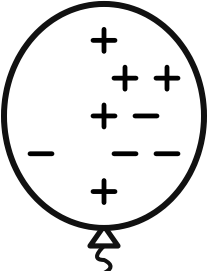

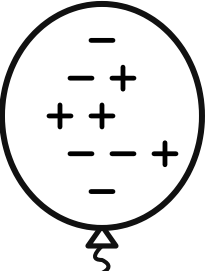

Net charge: $4 - 2 = +2$

More plus than minus, so the balloon is positive.

Key

+ positive charge

- negative charge

A + - net	B + - net	C + - net
D + - net	E + - net	F + - net
G + - net	H + - net	I + - net

Sort the balloons. Write each letter in the right box.

Positive more plus	Negative more minus	Neutral equal
---	--	--
